

CAB302 Sprint Retrospective

1. Please chose a template *

There are as many templates as people willing to create a new one. They all share the same goals and are used to reflect on the past week and plan for the next. You can experiment with different templates each week if you want, and decide which one serves you better. The one listed here are adapted from various online sources on Scrum and Agile practices.

- ○ FLAP
- ○ Hot Air Balloon
- ○ Sailboat
- ◉ Mountain Climber
- ○ Mad, Sad, Glad
- ○ Starfish

Mountain Climber

One more journey template, for good measure. Here your project is a climb up a mountain, and on the journey to the top you will find delays, obstacles, and help.

2. The Summit

Did we reach our goal for the past sprint?

We made progress on developing and improving our application, including implementing features, fixing issues, and incorporating user feedback. We also prepared our presentation individually, with each team member responsible for presenting their assigned section.

3. Stormy weather

What caused delays or setbacks?

Our main challenge was managing time alongside other university assessments and personal commitments. Sometimes, it was difficult to find a suitable time for everyone to meet and work together.

4. Climbing gear

What resources helped us to reach our goal?

GitHub helped us manage our code and collaborate on the project, while Discord allowed us to communicate, discuss progress, and coordinate tasks outside class.

5. Rocks and Boulders

What obstacles did we face?

We sometimes struggled with time management and left tasks until close to the deadlines. This caused us to rush before check-ins and submissions. In future, we could start tasks earlier and set internal deadlines to keep everyone on track.
