

CAB302 Sprint Retrospective

1. Please chose a template *

There are as many templates as people willing to create a new one. They all share the same goals and are used to reflect on the past week and plan for the next. You can experiment with different templates each week if you want, and decide which one serves you better. The one listed here are adapted from various online sources on Scrum and Agile practices.

- ( ) Hot Air Balloon
- ( ) Sailboat
- (•) Mountain Climber
- ( ) Mad, Sad, Glad
- ( ) Starfish

Mountain Climber

One more journey template, for good measure. Here your project is a climb up a mountain, and on the journey to the top you will find delays, obstacles, and help.

2. The Summit

Did we reach our goal for the past sprint?

We mostly focused on adding stuff that was mentioned in the user testing feedback, as well as stuff we were building on before with refactoring. We were able to present our stuff in front of the class, with everyone assigned a section to talk about

3. Stormy weather

What caused delays or setbacks?

There weren't necessarily any big setbacks other than sometimes our schedules not meeting up when having an upcoming meeting. Each of us had our own responsibilities outside of class, which we were able to manage and put effort into the project

4. Climbing gear

What resources helped us to reach our goal?

The resources were mainly the stuff that was found in the tutorial content were helpful as well as the user feedback form we created. Our main form of communication was Discord, where we would have meetings outside of class time, usually on Thursdays, and reschedule when individuals were unavailable.

5. Rocks and Boulders

What obstacles did we face?

We sometimes had difficulty with time management, where we would frequently get a lot of stuff done right before check-ins and have everyone available during meetings.
